## Elegance. Immersion. It's Object Audio Made Simple.

The LS7200's low-profile form contains a multi-driver array fed by a slim external amp connected via a single cable, reproducing Dolby Atmos® and DTS:X® soundtracks with conviction. Effects move from channel to channel, immersing you in multidimensional sound, while music streamed via Chromecast built-in*, AirPlay, or DTS Play-Fi®* over Wi-Fi® has substance that others can't match. Players connect to the receiver's four HDMI® inputs, and wiring is concealed for a near-invisible install. With multi-room audio distribution to any component or speaker supporting Chromecast built-in, DTS Play-Fi®, or FlareConnect™*, LS7200 tailors entertainment around your lifestyle.

*Enabled with a firmware update.*

# LS7200 3D Soundbar System

## Dolby Atmos® and DTS:X® Object-based Audio

DTS:X and Dolby Atmos are not mere improvements to existing formats; they've revolutionized sound mixing. Free from the channel bed, sound comes from all directions, even above, with angled drivers bouncing effects off the ceiling and into the audience. No extra speakers or cables required: just authentic and immersive sound from all around.

## Wide Choice of Listening Modes

A suite of advanced sound programs are on hand including new Surround Enhancer, a listening mode based on Dolby® technology, which wraps sound around the audience by means of virtual rear speakers. DTS Neural:X™, meanwhile, upmixes multichannel formats to 3D audio, while a variety of DSP programs tweak audio response to best suit music, movies, and games.

## Music Made Easy with Chromecast built-in*

Stream any music from your smartphone, laptop, or PC to the LS7200 with ease. Control playback with Chromecast-enabled apps you know and love from your iPhone, iPad, Android™ phone or tablet, Mac or Windows® laptop, or Chromebook.

*Chromecast built-in*

* Enabled with firmware update.

## Ready for DTS Play-Fi® Multi-room Audio

DTS Play-Fi allows you to enjoy high-quality music from connected online services, networked media servers, and your device library over Wi-Fi® to any number of compatible products using the Onkyo Music Control App for iPad, iPhone, and Android™ smartphones/tablets. DTS Play-Fi can synchronize the music in every room. Each member of your family can use their own device to listen to their own music in their room or group of rooms. DTS Play-Fi lets you easily structure a comprehensive multi-room ecosystem that satisfies virtually any need. For more information, visit www.play-fi.com.

## Life's Easy with Onkyo Controller

Our free app collects next-gen network functionalities, including streaming services and network audio, into an intuitive control interface. Perform general operations or send music to compatible speakers from your phone.

## Internet Radio and On-demand Streaming

TIDAL, Deezer, and TuneIn are baked into the GUI, which makes it super easy to select music using Onkyo Controller or the included remote. Spotify® subscribers can also cast direct from Spotify app to soundbar.

## Clean and Simple Connection

How do we send five audio channels to the soundbar without a tangle of wires? Simple: signals pass through a pin-type Multichannel Audio Cable. Plug your players into the receiver, link to the TV with a single HDMI®, and let simplified installation enhance sound with a cleaner look.

## FlareConnect™ Wireless Multi-room Audio

FlareConnect* shares audio from network and external audio input sources between compatible components. Enjoy effortless multi-room playback of LP records, CDs, network music services, and more with supported components and speaker systems. Music selection, speaker grouping, and playback management across the home are built into the Onkyo Controller app**.

**FlareConnect**

* Sharing audio from external inputs is enabled with a future firmware update. External audio inputs supporting FlareConnect may differ depending on model. Please consult individual product specifications for more information. ** Download free from the App Store or Google Play.

## AccuEQ Room Acoustic Calibration

In moments, AccuEQ measures and analyzes sound output from your speakers and performs corrections for beautifully clear and cohesive object audio in your listening space.

## Powerful Amps for Moving Sound

The receiver's slim form contains an efficient digital amplification system with independent power supply to deliver loads of clean power to the soundbar. Wireless sub has its own 50 W amp for deep LFEs in movies and games.

## Multi-Driver Soundbar System

Pairs of drivers are featured on the left, right, and center channels, while separate woofers reproduce height effects. Despite a slim profile of only 53 mm*, the multi-driver system delivers confident and cinematic sound with a clear view of the screen. * Excluding protruding parts.

## Wi-Fi®, AirPlay, and *Bluetooth*® Technology

Dual-band 5 GHz/2.4 GHz Wi-Fi assures a stable connection so you can stream over AirPlay and the local network. *Bluetooth* wireless technology provides a quick and simple streaming from your choice of app and device.
