Make Multidimensional Sound Your Cinema's Crowning Glory

Update your lovingly assembled home cinema and join the object-based sound revolution with a flexible and sophisticated controller capable of delivering a full-scale multidimensional surround-sound experience without caveat or compromise. DTS:X[®] and Dolby Atmos[®] formats are decoded and sent to your power-amp and floorstanding/in-ceiling speaker layout with utmost fidelity through RCA or XLR pre-outs, unlocking a truly immersive cinema experience. Premium DACs and VLSC[™] assures stunning purity for Hi-Res Audio, such as 11.2 MHz DSD, while separate digital/analog circuitry prevents interference on audio signals. Together with comprehensive wired and wireless multi-room A/V capabilities, app-based streaming via Chromecast built-in[®], DTS Play-Fi[®], FlareConnect[™], Wi-Fi[®], and AirPlay, and the latest HDMI[®] connections supporting BT.2020 and HDR (HDR10/Dolby Vision[™]) pass-through, this beautifully crafted centerpiece boasts every convenience to smooth the transition to next-generation entertainment. * Enabled with a firmware update.

PR-RZ5100 11.2-Channel Network A/V Controller

THX® Ultra2™ Plus-Certified for Reference Sound

Combined with a THX®-certified amplifier, the PR-RZ5100 controller's THX® Ultra2™ Plus certification assures distortion-free Cinema Reference Volume in large home cinemas. Certified products are subjected to the industry's toughest bench-tests to satisfy THX® requirements for audio performance.

Why Upgrade to an RZ Series Product?

Onkyo strives to create products that bring joy to the listener. The RZ Series is the culmination of 70 years of experience in high-end audio: future-focused, but with the analog tradition at heart. Every design element, every hand-selected part contributes to flagship performance: full-spectrum reproduction, transparent resolution, lightning dynamics, a sense of rhythm and soul... performance that overwhelms and fills you with emotion.

Noiseless Signal Processing with VLSC™

No matter how good the DAC, pulse noise is an inevitable consequence of digital-to-analog conversion. VLSC (Vector Linear Shaping Circuitry) compares vectors from the input/output signal and uses that information to erase digital noise. A pure, noise-free analog signal is fed to your amps, resulting in improved detail resolution and clarity.

DTS:X® and Dolby Atmos®

With 11.2 pre-amp channels, you can let your speakers deliver a complete multidimensional movie experience in your home cinema through a 7.2.4 layout. Dolby Atmos and DTS:X unlock sound from conventional channels and free audio to move above and around the audience for a thoroughly captivating and immersive movie experience.

Cohesive Multidimensional Sound

AccuReflex—part of the AccuEQ room calibration suite—phase-matches Dolby Atmos-enabled and floor-standing speakers for transparent and seamless reproduction of object-based sound. AccuEQ optimizes the entire system to suit your space without affecting front-speaker characteristics for pure stereo listening.

Upximes Standard Surround Formats

DTS Neural:X™ retrieves spatial cues from standard multichannel formats and upmixes for a 3D soundtrack that's virtually identical to a native DTS:X source, giving your existing Blu-ray library a new lease on life.

Chromecast built-in*, DTS Play-Fi®, AirPlay, Wi-Fi®, and Bluetooth®

Popular smartphone and PC music apps let you mirror what's playing to your PR-RZ5100 within moments using Chromecast built-in and DTS Play-Fi. The receiver also features AirPlay, Bluetooth, and Wi-Fi for universal wireless audio support, including DSD up to 11.2 MHz. *Enabled with a firmware update.

Spotify®, Deezer, TIDAL, and Tunes

Enjoy the music you want any time on your home cinema via these popular smartphone and PC applications or via Onkyo Controller.

FlareConnect™ Wireless Multi-room Audio

FlareConnect® shares audio from network and external audio input sources between compatible components. Enjoy effortless multi-room playback of LP records, CDs, network music services, and more with supported components and speaker systems. Music selection, speaker grouping, and playback management across the home are built into the Onkyo Controller** app.

* Sharing audio from external inputs is enabled with a future firmware update. External audio inputs supporting FlareConnect may differ depending on model. Please consult individual product specification for more information. ** Download free from the App Store or Google Play.

Housewide Playback of Any Source

Put extra speakers you have to good use—plug them in to an external power amp connected to the controller using its Zone 2 and Zone 3 pre-line-outs. Dedicated DACs and smartphone control app lets you manage digital and analog content via the controller in any zone.

Latest Dual-Zone HDMI®

Select HDMI terminals support HDR (HDR10/Dolby Vision™) pass-through, 4:4:4 color-space, BT.2020, and HDCP 2.2 for next-generation Ultra HD Blu-ray, streaming 4K video, and 4K/60 Hz PC-based gaming. Zone 2 output transmits 4K home cinema sources to a second TV.

* Enabled with a firmware update.
