Who we are

PMC are one of the very few companies who have been awarded an Emmy® for their contribution to recording excellence. With film, it would be easier to list the blockbuster movies which did not use PMC during the process of music production and post. Titles include: Titanic, Die Another Day, Spiderman 3, Pirates of the Caribbean and many more.

PMC reigns supreme throughout the leading mastering houses, broadcasters and much of the professional world. Key clients include Stevie Wonder's Wonderland Studio, Prince, Brian May, Robbie Williams, Hospital HDTV Broadcast London and for renowned classical labels such as Deutsche Grammophon, Decca and Harmonia Mundi.

PMC's design philosophy is quite a simple one, to design the ideal loudspeaker solution with the highest resolution possible. This supreme level of resolution is derived through unequalled R&D into (ATL™) Advanced Transmission Line Loudspeaker design and drive unit technology.

We believe a good loudspeaker should be able to relay the purest intentions of the artist and give the listener the ultimate audio experience.

wafer™ by PMC

wafer-art™

With **wafer-art™** you can now customize the **wafer™** series of on-wall loudspeakers and experience the ultimate studio reference quality sound in a highly individual and elegant form – The perfect look and perfect sound with **wafer-art™**

These stylishly framed bespoke printed speaker grilles are an enhancement and compliment to both the **wafer 1™** and **wafer 2™** slim-line on-wall loudspeakers. Their acoustically transparent, printed grilles offer style and individuality to any home entertainment system or commercial installation. The grilles are interchangeable with a range of options from solid colours to any high resolution image of your choice – build a collection of grilles to suit your mood and let your speakers enhance your room theme.

The **wafer™** range epitomizes PMC's award winning professional monitoring heritage in a compact and groundbreaking design ideally suited to the discerning listener and a perfect match for all contemporary installations.

Our image categories include:
Abstract, Artistic, Landscape,
Music and Nature.
Previews are available
on our website.

Each grille is individually produced with the highest quality, acoustically transparent materials, using state of the art manufacturing. Our extensive library of striking images provides a superb choice to suit all tastes and interiors. For the personal touch you can supply your own high resolution digital image, photograph or family portrait creating your very own unique wafer-art™ speaker grille.

Both smaller **wafer 1™** and **wafer 2™** slim-line on-wall models follow the identical design cues and contain the same intelligent innovations that allow for a perfect, rich, room filling sound without the need for large traditional loudspeakers. Both models are ideal for use in stereo or surround to create an unbeatable home theatre system. The **wafer 2™** provides deeper bass and the ability to produce higher levels of sound and therefore is suitable for both small and large rooms. Subtle user adjustments allow for tuning of the **wafer™**, so the sound and the look can be tailored to one's personal taste and interior.

BBC Wales

wafer™ installations

The wafer™ Professional heritage –

The proof of the wafer's ability to communicate the true essence of a piece of music or the spine tingling tension of a movie is not only described by the world's audio press but endorsed by the world's leading studios. Highly critical engineers rely on the wafer's clarity and reliability day in day out whilst producing the entertainment everybody enjoys. **wafer™** models not only appear at the BBC's Broadcasting House, London, but they are also used in the studios for the creation of the legendary Dr.Who and Torchwood series.

Commercial installations & Home Cinema

wafer™ also appears throughout the highly fashionable Rough Trade East record store and both commercial and private cinema's throughout the globe.

A small sample of the comments from leading audio magazines

wafer 1™

"There's no denying the effectiveness of its disappearing act" "the wafer1 sounds significantly bigger than one expects" - Hifi Choice.

wafer 2™

"This is an exceptionally clever 'stealth' speaker, which takes unobtrusiveness towards invisibility. They are beautifully even, delicately smooth with impressive stereo imaging"

"The typical comment made by industry insiders was "They can't possibly work!" when they saw these hang-on-the-wall PMC speakers. They were wrong! The wafer2 most certainly is a real hifi speaker"- Hifi Choice.
