

musicCast

a new world of wireless freedom

Perfect fit for all your musical scenarios

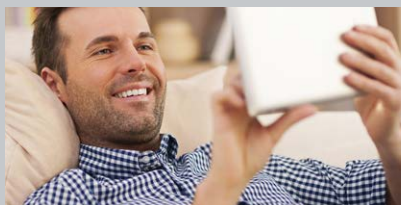

musicCast

musicCast

MusicCast is a new revolution in network audio, use all your MusicCast products together or separately, it's completely up to you. Control it, all from one app, designed to be intuitive, quick and simple to use. Use a soundbar, a wireless speaker, an AV Receiver, HiFi system whichever suits you best, mix and match then expand your MusicCast system as time goes on.

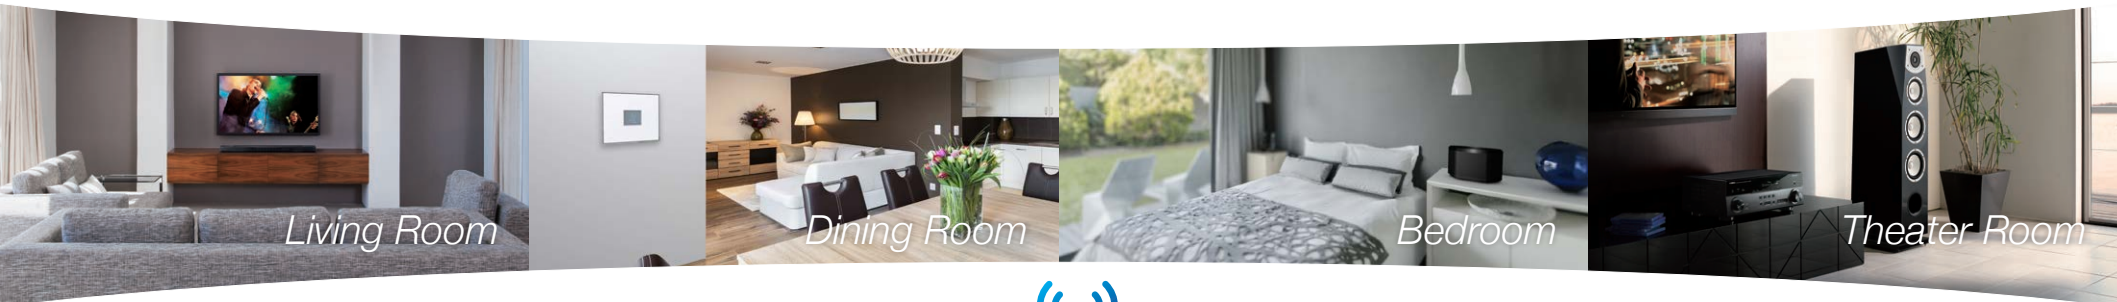

All new from Yamaha, the MusicCast system brings everything to everywhere for everyone.

Stream the Same or different Music to Each Room

Play the same song in multiple rooms, or play different songs in each room.

With MusicCast, freely enjoy the music you love anywhere in your home, whether it's from your smartphone, or from a streaming service, PC or NAS over a network.

Living Room

Dining Room

Easy Paring

Pairing operation is simple with the MusicCast App, and in *Bluetooth* output setup as well easily pair target devices and *Bluetooth*-enabled equipment just by selecting them.

Supports High-resolution Music Content

MusicCast supports a variety of audio formats including MP3, WAV and FLAC. All MusicCast products support 192kHz/24-bit high-resolution audio codec, letting you enjoy your music with extremely high quality sound.

**MP3
CD**

**High-
resolution**

Compared to compressed sound sources, high resolution sound sources more accurately reproduce the sonic details, presence, and atmosphere of a concert hall.

MusicCast Network Technology

MusicCast features two network configurations, Standard Mode for connecting compatible equipment and routers directly, and Extend Mode that enables WiFi signals from MusicCast products to be transmitted over longer distances. Choose the optimal network setup for your home environment.

Standard Mode

Extend Mode

* In Extend Mode, a minimum of one device must be connected via router and cable.

Eco Design

We think eco design is an essence of product development. All MusicCast models feature Network Standby power mode that achieves low power consumption of under 3W. In addition the Automatic Standby function automatically turns the power off after 20min with no signal elapses. This eco-design makes MusicCast thoroughly friendly to the environment.

3W

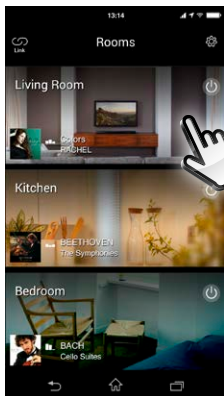

Control All Your Equipment at Will with Just a Single App

Simply tap the beautifully designed screen and take control of all the audio equipment and all the music in your home. There are a wide variety of capabilities like the Link function that lets you play the same song in different rooms simultaneously and the ability to freely customize the room screen with your own pictures. Make your musical world even more exciting.

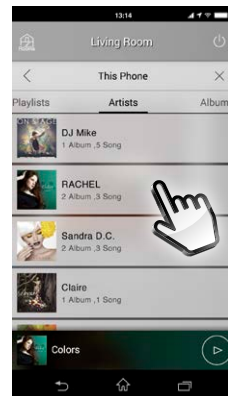

Simple operating functions let you easily play the music you want to hear

Select a room

Select source

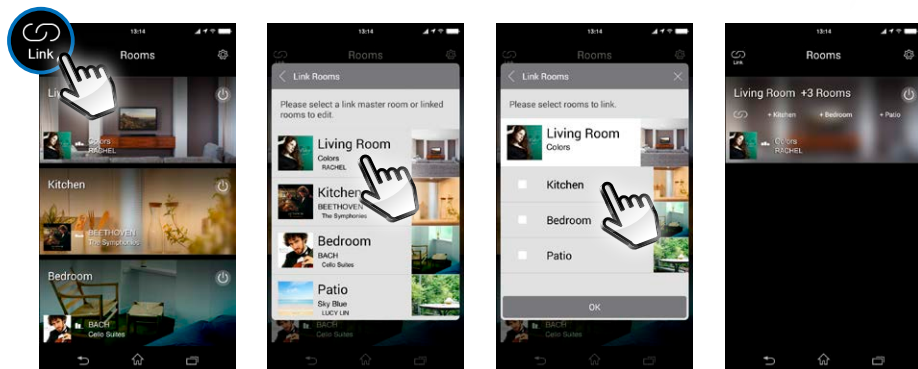

Select a song

Link Functions

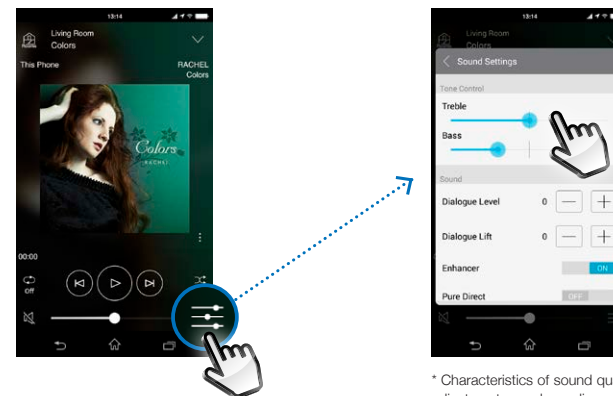

Play the same song simultaneously in multiple preset rooms.

Push the Link button → Select Master room → Select a room to link → Linked room cells merged

Sound Setting

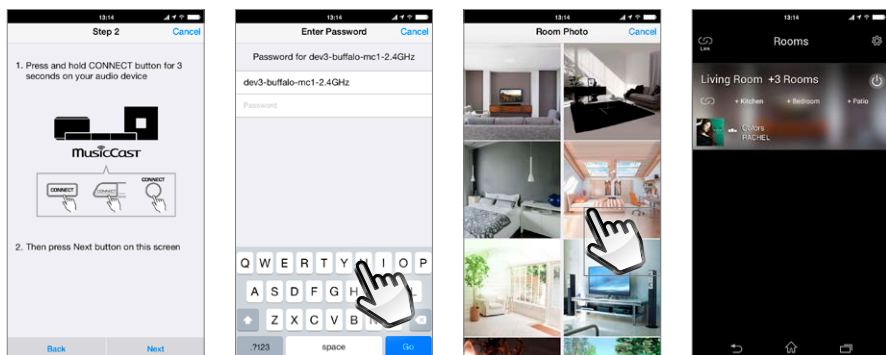

Using sound setting or EQ, you can adjust a selected device's sound quality. Maximize each device's performance.

* Characteristics of sound quality adjustment vary depending on the device.

Easy Initial Setup

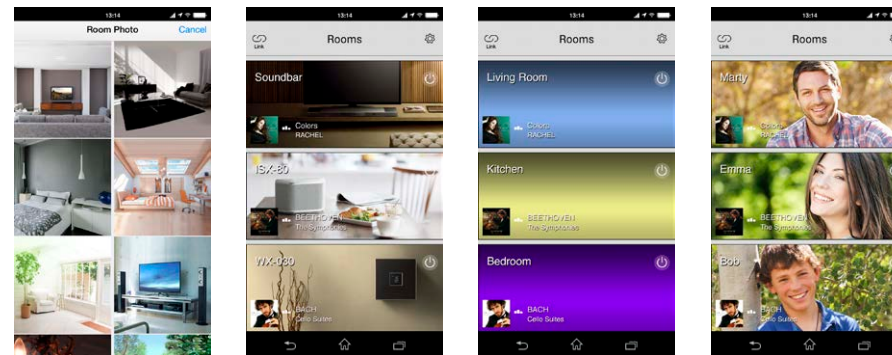

You can perform the MusicCast initial setup very easily by using the App.

Press the Connect button → Input the password of your wireless router. → Choose room name and room photo. → Finished!

Room Display Customization

Freely set up the room screen in a way that is easy to understand using photos you've taken yourself.

< Room photo > < Device photo > < Color > < Person's photo >

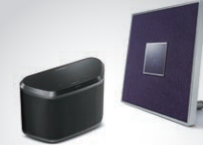

With MusicCast, choose the optimal style of sound to suit any environment.
