## New DALI MENTOR MENUET

It is with great pleasure that we introduce you to the newest and smallest loudspeaker in our MENTOR series. The DALI MENTOR MENUET - a small, yet powerful speaker that reveals great musicality that will set new standards for sound and performance from a compact speaker.

Conceptually, MENTOR MENUET is a compact bass reflex loudspeaker measuring only 25 x 15 x 23 cm/9.8 x 5.9 x 9.0". Even though it is only based on a 4.5" woofer and a 28 mm/1.1" soft dome it more than makes the grade. Listen to these brilliant tiny loudspeakers and you will hear plenty of clean, undistorted bass, open and dynamic midrange and detailed/crisp highs.

The 4.5" woofer is air flow optimized to achieve the best possible coupling between the wood fiber cone and the real wood veneer cabinet. Even the woofer cut-out in the cabinet is made larger than normal to optimise openness and dynamic response. The oversized 28 mm/1.1" soft dome tweeter is able to start and stop with great speed and precision due to the very low mass of the dome assembly and a powerful motor system (the dome is approximately 30% lighter than comparable standard domes and the magnet in the motor system is made of the strongest neodymium material available). The DALI designed drivers, sturdy binding posts and high quality crossover is the key to achieving extraordinary performance from such a compact loudspeaker.

For optimum performance, MENTOR MENUET should be positioned in a bookshelf or mounted on the wall using an optional wall bracket. With two threaded inserts on the rear of the cabinet, it is prepared for easy installation of the wall bracket without any hassle. The bracket is designed to ensure optimal clearance between the wall and the bass reflex port.

The neat and clean design - makes it very easy to place the tiny DALI MENTOR MENUET anywhere around the house. Alternatively, combine them with other speakers in the acclaimed MENTOR series for a high-performance stereo set-up or home cinema system. Either way, you're in for an experience.

### Technical Specifications:

Frequency Range [+/- 3dB, Hz]	68 - 25,000
Crossover Frequency [Hz]	3,000
Sensitivity [2.83V/1m, dB]	86
Nominal Impedance [ohm]	4.0
Maximum SPL [dB]	105
Enclosure Type	Bass Reflex (rear)
Recommended Amp. Power [W]	20 - 100
Terminals	Single-wire
Dome Tweeter [mm]	1 x 28
Low Frequency Drivers [inch]	1 x 4½
Dimensions [H x W x D] [cm]	25 x 15 x 23
Dimensions [H x W x D] [inch]	9.8 x 5.9 x 9.0
Weight [kg/lb]	4.0/8.2
Optional Accessories	Wall Bracket
Finish	Cherry Wood Veneer, Black Satin, White Satin
