

Tube Box S

MM/MC phono preamplifier with tube output stage

- Audiophile Performance
- Audiophile-grade ECC88 tubes (AX7)
- Dual mono configuration
- Audiophile-grade polypropylene WIMA capacitors
- Precise RIAA equalisation
- Switchable input impedance/capacitance
- 3 adjustable gain levels
- Subsonic filter
- Outstanding sound quality

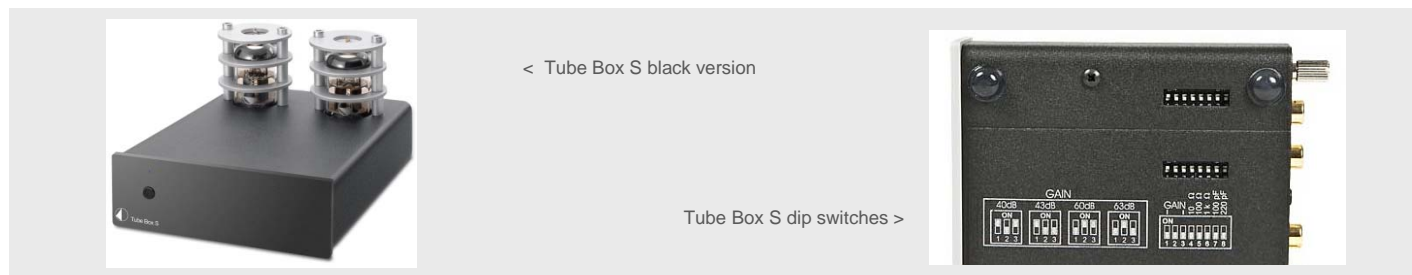

Input impedance	10/100/1k/2k ohms(MC)/ 47k ohms (MM)
Input capacitance	50/150/270/370pF
Gain switch	41/51/61dB
Signal-to-noise ratio	MM (41 dB): 84dB (94dB - IEC -A) MC (51/61 dB): 67dB (75dB - IEC -A)
THD	0,01% MM/ 0,05% MC
RIAA deviance	max. 0,4dB / 20Hz - 20kHz
Subsonic filter	-12dB @ 20Hz (non switchable)
In/Out sockets	1 pair RCA connectors
power consumption	470mA / < 1 watt in standby
oversized power supply	18Volt DC/1000mA
Dimensions (WxDxH)	103 x 74 x 104 mm 103 x 74 x 115 mm (with sockets)
face plate colour	silver or black
weight	810 g net

Tube Box S: audiophile, versatile & affordable!

This new phono preamplifier with tube output stage offers unrivalled performance and unique flexibility, which never before was available at this price! Sonic quality of Tube Box S is extremely impressive, a big improvement to Phono Box S and an audiophile upgrade for most analogue hifi system. With a wide range of setting parameters, it can meet the needs of almost any phono cartridge on the market. Carefully selected audiophile-grade components make it possible to enjoy your valuable vinyl collection like never before!

The class-leading music reproduction of Tube Box S gives pure dynamics, full transparency, analogue warmth, bass texture, detail resolution and purity of all audible frequencies. >>> **Best-buy tube phono preamplifier!** <<<
