EVO E45

THE SOUND OF BEAUTY...

## SLIM, STYLISH, AND WELL-SOUNDING SPEAKER

Tangent EVO E45 arrives as a natural extension of the successful EVO series. Tangent EVO E45 employs the same driver units as the critically-acclaimed and popular E5 speaker. Here, however, no less than four 5" bass drivers are put into service, delivering an impressive sound pressure and deeper bass than the single 5" driver found in the E5.

The chic design that defines the EVO E45 allows it to fit into the majority of interior decorating themes. The outstanding power delivered by the four driver units allows the customer to use it as stereo speakers or even front channel speakers in a surround sound system. The easy electric load gives you a large freedom in selecting an amplifier for EVO E45. Describing the EVO E45 as a flexible and multi-faceted speaker therefore fits the bill well.

Producing the high-quality sound in the EVO E45 is helped along out by powerful magnets. This achieves full control over the glass fibre membranes used in the four 5" bass drivers. For treble effects, the same great-sounding softdome tweeter known from the rest of the EVO speaker range is used. In the first-class cross-over filter only foil capacitors and large coils are used. Tangent has combined these high-quality components to truly create a stylish and well-sounding speaker in the EVO E45.

## FEATURES

- Chic design that fits everywhere
- Compact but powerful speaker
- 4 X 5" super strong bass
- Flexible and multi-faceted
- High gloss finish
- Danish designed and engineered

## SPECIFICATIONS

System	3-way bass reflex
Recommended power amplifier	10-200 Watt
